

Jet Reports Express for Microsoft Dynamics NAV

Empower your employees to make timely, informed decisions with this Microsoft Excel-based business reporting tool. Jet Reports Express for Microsoft Dynamics NAV gives you a simple way to create self-service reports and analysis – fast and easy. Create, modify, and run your own business reports using Microsoft Dynamics NAV data in a simple and familiar environment – right out-of-the-box – to improve and share business insight across your company.

KEY BENEFITS:

Easier ad-hoc reporting across your company

Get the answers you need to questions about your business – from finance and sales queries to key performance metrics. Use the intuitive interface of Jet Reports Express and simple formulas in Excel to create high-impact reports. Take advantage of the multiple report templates available out of the box and present your findings in a single, well-formatted report.

Self-service analysis – out of the box

Answer and analyze ad-hoc business queries quickly and accurately in Excel with real time data from Microsoft Dynamics NAV by using Table Builder. Access and combine all the data you need from your business

system – including tables, fields, flow fields and dimensions. Slice and dice data and consolidate information and analysis. With just one click, you can drill down into any value in a report to see the underlying data.

Easy to learn and use

Create powerful reports using simple features in Jet Reports Express and familiar Microsoft Excel tools, capabilities and logic, such as PowerPivot, formatting, charting, pivot tables and formulas. There's no time-intensive learning curve, no running to data warehousing or IT to program your report, no cutting and pasting – just easy, impactful business reporting you create right in Excel.

Powerfull Excel add-in

Clear intuitive insight into your accounts recievables

JET REPORTS EXPRESS FOR MICROSOFT DYNAMICS NAV

Better business insight for your entire company

Understanding your business data is an important part of running a successful business. But Business Intelligence applications can be an expensive and complex investment.

With Jet Reports Express for Microsoft Dynamics NAV you and your employees can get the answers you need to your specific business questions – fast – and create high-impact reports and simple analysis.

Management can:

- View key performance metrics across all areas of the organization in real time using the Table Builder function.
- Track consolidated profit and loss by division and company.

Finance can:

- Detail profit and loss with updates on a daily, monthly or quarterly basis.
- Stay on top of accounts receivable KPIs in terms of days outstanding, past collection performance and more.
- Run financial reports from your General Ledger by using the GL function and distribute them on a daily, weekly or monthly basis.

Sales can:

- Easily build product sheets that pull current pricing and specifications, and instantly update and release important changes.
- Create a sales dashboard using PowerPivot for Microsoft Excel 2010 that tracks sales on a monthly basis, with budget projections for future sales.
